

EBARA RAINWATER HARVESTING SYSTEM Type RHS

COMPACT AM-PC

JESXM

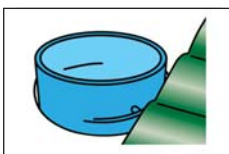

IDROGO

EBARA Rainwater harvesting is an innovative alternative water supply approach everyone can use. Rainwater captures, diverts, and stores rainwater from the roof; thus is one of the most efficient water supply solution for domestic, business and industrial premises.

EBARA Rainwater Harvesting System (RHS) utilizing quality EBARA pump and controller, used in conjunction with rainwater tank and accessories, developed a complete rainwater collection and distribution system that provides you with relatively maintenance free operation. Thus help ensuring a safe, sustainable source of water that can meet all of a household's requirements.

Accessories available (optional) :

1. Gutter Diverter

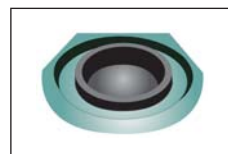

2. Leaf eater

3. First Flush Diverter

4. Rain Water Tank

5. Tank Screen

6. Mozza Stoppa Screen

7. Vent cowl with
insert proof screen

8. Tank Top-up Sytem

9. Sinker Float
Sensor

10. Gutter Outlet

11. Pump

12. Raincontrol
Switch

13. Rain Filter

EBARA RHS will switch automatically to the water supply mains when rainwater tank runs low, or during occurrence of power failure. The EBARA pump work automatically when demand of water is needed e.g. washing car or gardening. EBARA RHS is only activated when the rainwater is being used from the rainwater tank; thus help ensuring rainwater harvesting system deliver superior results.

FEATURES/BENEFITS

- Easy installation and require no maintenance; thus trouble-free operation expected.
- Built-in dual check valve for prevention of unnecessary backflow of water; save water usage at all time.
- Switch automatically to water mains during power failure or pump failure, thus ensure continuous water supply.
- Depending on site requirement, EBARA RHS has the option of using below EBARA pump type:
 - Horizontal multi-stage pump model COMPACT AM-PC
 - Self-priming pump type JESXM
 - Submersible pump type IDROGO
